BIO MINERAL POT

What Kind of Water is Natural Water?

Natural, Ionised Water, Mineral Water

All life on earth is created from water & depends on it for survival. Our planet has been successfully recycling the same water on our planet for millions of years. There are thousands of natural sources of mineral spring water around the world. Many of these sources are world renowned for health-giving & sometimes miraculous curative effects. Some of these include:

• Germany's Nordenau spring • France's Lourdes spring • Okinawa's subterranean spring

Scientists have explored & verified many of the immediate & long term benefits from drinking these waters, which have been the major focus in the marketing of bottled spring water. All of these spring water sources have rich natural mineral content, providing essential minerals to our bodies which aid in cellular maintenance & recovery

Our Bio Mineral Pot Ace Water

Waters Co 'Mineral Pots' have been developed by some of the world's leading water research scientists with a specific outcome in mind. This is simply to replicate nature's principle for filtration of water & to produce from tap water the equivalent of natural spring mineral water. To do this, we've incorporated our patented multiple stage filtration components, including membrane filters, activated silver ionised carbon, bio ceramics which produce far infrared, magnets to restore natural energy & hexagonal micro cluster water cell structure & Somelite which blends around 60 natural sea based minerals, creating an alkaline water easily absorbed & used by our cells.

The result is clean, fresh, alkaline, energised mineral water & a taste you'll love. Highly effective in hydrating cells, giving you more energy & stronger immune system.

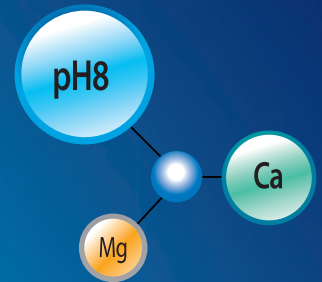

Why good quality water essential for our body

Your body consists of around 70% water. We depend on daily water intake for every major organ down to the very smallest of cell to function & sustain life. The tap water which we use is contaminated by chemicals & other undesirable substances added during treatment. By the time it reaches your tap, rust and many other kinds of pollutants. These pollutants find their way into the water source, particle by particle and become harmful to the human body. Bio mineral pot Ace, uses special materials that remove harmful substances such as heavy-metals, chemicals & bacteria Bio mineral pot Ace produces an alkaline water by adding around 60 naturally found organic minerals which are easily absorbed into the blood stream to support our cells. Water is magnetised reducing water molecule size & producing natural hexagonal water cell structure. Bio ceramic balls produce far-infrared rays which energise & give life to water & boosts cellular activity in the body. This allows for more rapid hydration & increased cellular functionality giving you better physical & mental performance and a stronger immune system.

What is the Purpose of Mineral Pot?

- Activated coconut shell carbon bonded with silver reduces impurities, chlorine, chemicals, heavy metals, fluoride & bacteria.
- Quickly re-mineralises tap water - Minerals support immune & cellular functions increasing vitality.
- Alkaline, Energised & magnetised water - Help to hydrate you more effectively & stimulate cellular functions.
- Clean, fresh, great tasting water - Drink more water, less tea, coffee, soft drinks etc save \$ & improve your health.
- Simple, compact size, lightweight - no electricity or tap connection required.
- Economical and easy hydration - At around 2 cents per litre you can avoid expensive bottled water.
- Environmentally sound - No landfill waste from discarded disposable water bottles.
- Filters up to 4800 litres - Has a replaceable filter cartridge with 2 year life span.
- Portable for travel & holidays - Peace of mind in knowing you can control what you are drinking anywhere you go.

Testimonies

"I have been using the Ace Bio Mineral Pot Filter every day for twenty years & it has helped to keep me feeling healthy & young at 80+ years of age. I had also used for a short time another filter system but found that the taste & quality could not compare to the Mineral Pot"

I Mohrer, Elwood Vic.

"I have been Practicing Naturopathy for over 20 years in that time my family & I have been using Waters Co Mineral Pots to help maintain good health. As a practitioner I have been recommending & supplying these system since the 1980's to my patients"

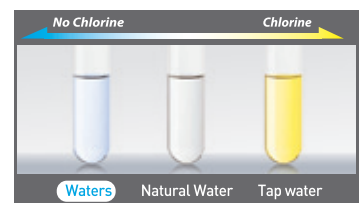

H. Barber Naturopath

Features of Ace Bio Mineral Pot

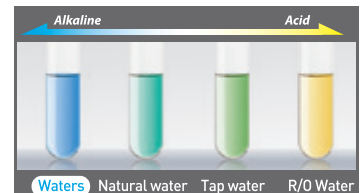

Elements	Why its undesirable in tap water	Reduce up to (%)
Lead (Pb)	Delays in physical and mental development in children; Kidney problems and high blood pressure in adults	98.2
Zinc	Bad taste & clarity	97.5
Cadmium	Kidney damage	97.3
Chlorine	Bad taste & odour. Formation Trihalomethane (THM)	99.0
Aluminium	Suspected cause of Alzheimers disease	97.5
Fluoride	Darkens Teeth	85.0
Nitrate (NO3)	Inhibits oxygen supply to cells	85.0

Standards of Ace Bio Mineral Pot

Standards
No Plastic Leaching
No Dioxin Leaching
Durable
Reuse again and again to prevent waste
BPA Free

● Measurement of residual chlorine

● Measurement of acidity & alkalinity

Specifications

MODEL	ACE BIO MINERAL POT	FILTER LIFE SPAN	FILTER COMPOSITION
TOTAL SIZE	120mm (D) x 290mm (H)	4800 Litres	Pre Filter Pads 80 piece x 14 days each
WEIGHT	1.1 kg Empty, 2.6 kg Full	e.g. 6.5 litres per day = 24 months	Upper Filter 4 PC x 6 months
POT CAPACITY	1.5L	It is recommended to replace filters as follows	Main Filter 1 PC 24 months
			Mineral Filter 1 PC 24 months
