

TESTIMONIAL
WATERS CO MINERAL POTS

I am 87 years old and play nine holes of golf a week. I am still using the original Waters Co Mineral Pot that I purchased over 20 years ago and am now updating only because the replacement filters are no longer available for this original model.

I have had both my hips and knees replaced due to chronic arthritis in my joints.

I am convinced that my continuous use of the mineral pot has been a major factor in my successful rehabilitation after these major operations. I use the water from my pot when making cups of tea and coffee, cooking and when I just need a refreshing glass of water after being out working in the garden. Visitors often comment that the cuppas always taste better when they have them at my home and I just say, "It's the mineral pot water". I also use the water when bathing scratches or abrasions that just seem to appear a little more as you get older.

I attribute my longevity and current good health to my mineral pot.

Mrs. Im had a serious skin disease; she was constantly scratching her skin because of perpetual itch. It got so bad that she scratched herself to the point where she drew blood. This condition of thirty years made her a virtual prisoner in her own home.

Her pharmacist told her that she would have this condition until the day that she died. This news made her feel like she wanted to die. But Mrs. Im would not quit. She tried many different solutions until one day; one of her neighbors introduced to her the Waters Mineral Pot.

To her surprise, she found that the Waters Mineral water helped her itching problem whenever she rubbed it on her skin. By using this mineral water on a daily basis, her skin condition gradually improved. This process resulted in a significant drop in her medical bills. Today Mrs. Im and her family are great advocates of all Waters products.

April 1997 saw me buying a Waters Co Mineral Pot for my Family. My neighbor and I were discussing the drinking water one-day and she remarked that she had just bought a Mineral Pot for her family and had really noticed a difference in their various complaints. After following a tasting test with tap water and mineral pot water I was amazed at the difference between them in taste. After discussion and talk with the representative for Waters Co- I decided to purchase one and see what effect it had on my family.

My family consists of five people and each one of us could recognize something that we would monitor with Mineral Water to see if there were any significant changes. I list the follow results.

My husband is 58 years of age and is a diabetic, suffers from severe cramps in the legs and hypertension. Within two weeks of drinking only Mineral Water (as a cold drink) and having tea/coffee also made with Mineral Water – he was able to stop taking his tablets for cramp, reduce his hypertension tablets by one per day and his diabetic sugar count decreased by 4 points. E.g. prior to Mineral Water, reading was 13.7, after two weeks of Mineral Water his reading was 9.5.

NOW he is able to walk our 13 and a half-acre farm after full days work and still does not suffer with cramps. He also does not now drink diabetic drinks – has the occasional beer – tea/coffee made with Mineral Water and Mineral Water ice blocks in milk. His health has improved immensely, and as is known – diabetics are susceptible to Ulcers if the injure themselves. He recently had a nasty fall cutting his kneecap open on steel. I bathed his knee with swabs of hot Mineral Water regularly, and this did not ulcerate at all or get infected.

My parents in law purchased their "Mineral pot" in 1988 as my father in law was in ill health. Whilst initially being skeptical I soon saw the benefits as in better tasting water, cleaner water etc. This should be put it into perspective that at the time we lived in Adelaide. We shortly thereafter purchased our own Mineral pot in 1988.

Since then we have purchased another to replace our initial one in 1988.

We recently had problems in purchasing replacement filters so embarked on a search both locally in health shops etc and on the internet. Your contact information came up after a number of searches - always pays to have the correct words to put in internet searches. With our replacement filters now in hand we can look forward to many more years of great tasting, clean healthy water.

Regards

John

I have been practicing Naturopathy for over 20 years in that time my family & I have been using Waters Co Mineral Pots to help maintain good health. As a practitioner I have been recommending & supplying these systems since the 1980's to my patients, friends & family. Mineral Pots supply fresh, great tasting water from both Tap & Tank water supplies.

I have found many patient benefits linked to the introduction of these systems including: Better looking & healthier skin, relief from migraines, less fatigue, better moods & increased consumption of water due to the great taste, which eliminates many potential long term health issues related to dehydration. Even kids love to drink it.

H.B Naturopath. Vic

I have been using the Ace Mineral Pot Filter every day for twenty years & it has helped to keep me feeling healthy & young at 80+ years of age.

I have gone to considerable effort to find replacement filters for my Mineral Pot rather than trying another brand.

My old Mineral Pot is now retired, because the representative said it was looking a bit tired and I have been given a new (free) Ace Mineral Pot, which I expect will out last me.

I'm thrilled with the service I've received from Waters Co as it is very unusual these days to get such personal attention.

I had also used for a short time another filter system but found that the taste & quality could not compare to the Mineral Pot.

I feel well qualified to highly recommend Mineral Pot Filters.

Dear Waters Co.,

I live in the United States and purchased a mineral pot online from your company a few years ago because I can't find anything like it in the States. . I LOVE IT!!!

Thank you so much!!

Amanda Smith

I have a Waters "Super" Mineral Pot, which I purchased approx 12 years ago. I have been using it daily since & wouldn't think of changing.

Thank you.

Lyn

I am 53 years of age, have raised a family of six children and lead a very busy life with school boards and running a farm as well – just to mention a few. I have very bad Arthritis from my hips down and in my elbows. I had to buy a farm bike because I could not walk from paddock to paddock to feed out. Since being on Mineral Water I have slowly and steadily been able to reduce the need for anti-inflammatory medication. I also used to get very tired and showed some signs of depression and not really caring about my appearance at times. NOW I also walk the 13 and a half-acre farm, can carry a bale of hay. I and back knitting and sewing, and even riding a two wheeler bike and walking. My immune system seems to have improved, having only had one cold this winter and my general stamina is terrific. I also only drink Mineral Water – tea/coffee with Mineral Water. I cook all vegetables in Mineral Water and the flavor is far more pleasant, and the vegetable are more like crisp blanched vegetables, not ones that taste as though they have never been washed. I am now only taking arthritis tablets once a day instead of 3 times a day.

My 16-year-old daughter has cerebral palsy with complications and has also found that her energy levels have increased since the Mineral Pot came into her life. Her acne skin has almost cleared away and now only at certain times gets an outbreak. This child was one that needed high levels of drinks – e.g. orange juice, coke, lemonade etc – now only very occasionally does she ask for this type of drink. Mineral Water goes to school in drink bottles. Her hair is not as oily and her skin is of better condition.

My daughter of 12 years of age has also experienced many of the same things as her sister. Also her energy level has risen substantially and she will go for either a four-kilometer walk or bike ride each night. Approaching her teenage years, she has already seen that her skin is far better in condition than some of her classmates. She also drinks only Mineral Water in hot and cold drinks.

My son of 4 and a half years of age calls this his “HAPPY WATER”. Everywhere we go he asks for happy water to drink and gets some very strange looks. He is a very hypo-active child who loves sweet drinks, ice-blocks, fizzy drinks, and lollies. Since we have had the Mineral Pot which is accessible to him at all times – he never asks for any of the above things. He also had a problem with concentration as this has improved ten-fold since April. He now sleeps 10 hours minimum at night eats three meals a day – before he would only pick at his food. He is concentrating on his lessons at day care as well as his individual speech tuition and the improvement is amazing. He also had very poor teeth – having had something like 9 fillings since the age of two years old. At his latest check-up his specialist could not believe that there was no further decay in his mouth.

Our family is sold on the Mineral Pot, and when we go caravan or boating or even just on a picnic, the Mineral Pot is part of the essential items. I can leave Coke, Fanta, Lemonade or Cordial in my fridge for three to four weeks at a time and my children NEVER ask for it or help themselves to it. It is usually the visitors who drink it if my 4 and a half-year-old cannot sell them on Mineral Water first. He always offers our visitors a drink of Mineral Water before a cup of tea. He tells everyone it makes you happy not nasty and naughty.

I am not one to BRAG about a product – but I am delighted with the difference it has made my family, especially with the variety of problems we have and the results we have observed.

THANK-YOU MINERAL POT – YOU ARE AN IMPORTANT PART OF OUR HEALTH –Especially with our, “LOVELY HAPPY WATER”.

Shortly after giving birth to my child, I did not feel well at all. I did not have much energy to do anything and I felt totally lethargic. Consequently, I did not exercise and the pounds accumulated. My doctor was worried as my waistline was rapidly expanding. The added weight resulted in other health problems. A disk problem in my back soon followed. Realizing the seriousness of my situation, I decided to start walking to get rid of the extra weight that I was carrying around. But that attempt to get serious was futile as five minutes of walking only left winded and completely exhausted. Afterwards I had no energy to do my everyday housework. I also was not much help to my husband who works as a minister. Day by day and little by little my health deteriorated. Nothing I did worked. And I was becoming more discouraged by the bulging waistline. I became so depressed because I looked older than I was.

One day at church, a parishioner mentioned something to me about the Mineral Pot Water. When I heard about it the first time, something inside - call it women's intuition if you will - left me feeling elated and happy for the first time in a long, long time. I felt that I had finally found what I was looking for.

After buying the Mineral Pot. I drank the water non-stop. I drank it when I first woke up in the morning and I continued drinking it throughout the day until I went to bed at night. After a week had passed. I could not feel as much pain in my waist. I could not believe it. After a month had passed, it seemed that the waist pain had completely disappeared. Now I feel better than ever and am on the road to a complete recovery. I truly believe that I got well because of drinking the water of Waters Company. I will always swear by this product as it has enabled me to live again. I am proud of myself because I feel so good. Thank you Waters Company.

Dear Waters Co,

We have had the Mineral Pot 300 Super for 18 months and we are still very pleased with the taste and clarity of the water. It has been beneficial to our health and we would recommend a Mineral Pot as an asset for every home.

Thank you.

"I first became aware of the benefits of good hydration and filtrated water in 1997 and purchased the Ace Mineral Pot which has a 1.5 litre capacity. I followed Waters Co. testing procedure to check for residual chlorine, acidity/alkalinity and calcium/magnesium quantities in my tap water compared to the mineral pot water. The tests for chlorine and acidity/alkalinity were not that dissimilar, most probably due to having access to reasonable city supply water. The major difference I found in the testing however was in the mineral content. The activation of the water via the sea based minerals added by the Waters Co mineral filter definitely proved it was superior for drinking water. This is in addition to the removal of bacteria, harmful chemicals and heavy metals.

I had friends and family who were sceptical back then of water treatment systems yet I found they never went to my tap to get water! Eventually some of them went on to purchase filters for themselves. I found I was using more and more filtrated water so in 2000 I purchased the BIO Mineral Pot 400 which holds 4 litres. The additional capacity allowed me to easily take filtered water to work and use in my cooking.

Recently needing to change the filters in my mineral pot I decided to research other products given the growing awareness and choice now in the marketplace. I found as many claims as there were brands available. Whilst each system I compared removed varying degrees of contaminants it was only the Waters Co filters that added the unique benefit of trace elements. It is this that has kept me a faithful devotee of the Waters Co filtration products for the past ten years and to continue in the years to come."
